## PROJECT EXPERIENCE

**Space Tourism multipage website** | February 2026

- Engineered an immersive, multipage UI using **React** and **Tailwind CSS, and Framer Motion** translating complex cinematic designs into a fully responsive, pixel-perfect user experience across all device breakpoints.
- Leveraged **Framer Motion** to engineer 60fps staggered entry animations, parallax character effects, and fluid page transitions.
- Architected a multi-step booking flow using **React Hooks**, allowing users to select destinations and persist mission data across the application.
- **Results**: Delivered an app-like immersive journey that maintains 60fps animation performance, reducing user drop-off through intuitive navigation and a frictionless "Explore" to "Book" conversion path.

**Favvylee Bakes and Events** | January 2026

- Built a responsive business website using **Nextjs, Typescript and Tailwind Css**
- Built reusable UI components and implemented mobile-first design principles
- Integrated **click-to-WhatsApp contact integration** to enable direct customer inquiries and orders
- Collaborated with the business owner to translate business needs to functional UI
- **Results**: Improved online presence and brand credibility through a modern web interface, Reduced friction for customers by enabling direct WhatsApp contact

**Portfolio Development** | 2025

- Designed and deployed a developer portfolio showcasing projects, case studies and technical articles using **Nextjs, React, Typescript, Tailwind CSS**
- Added micro-interactions using **Framer motion** while maintaining Core Web vitals
- Integrated a blog with SEO-friendly routing, metadata and social sharing
- **Results**: Increased engagement (**time-on-page +40%**) and streamlined access to demos and code for recruiters
